## The Elba Clipper

VOLUME 70  
ELBA, ALABAMA 36323, THURSDAY AUGUST 17, 1967  
NUMBER 4

### Mrs. Bess Is Named "Outstanding" COMMUNITY ACTION OFFICE OPENS

Mrs. Evelyn Henderson Bess, instructor of Cosmetology at MacArthur Technical Institute has been selected as one of the Outstanding Young Personalities of the South. Her biography will appear with those of other outstanding young men and women in the 1967 edition to be published soon.

Personalities are selected for this publication in recognition of past achievements, outstanding ability and service to the community, state and nation. Her biography will appear with those of Southern Governors, members of Congress, and with business, civic, educational, and governmental leaders of the South.

Mrs. Bess is a native of Coffee County, was trained in the elementary and secondary schools of Florida, and received her specialized training at the George Wallace State Technical Institute at Napier Field. She is married to James Bess, a successful young farmer and businessman of the Perry's Store community. They have one daughter, Brenda, who is still in high school.

Since June 1966, Mrs. Bess has been a regular member of the staff at MacArthur Tech. The demonstration of her outstanding ability and qualities of leadership in her work certainly qualify her to receive this honor. MacArthur Technical Institute is proud to claim her as a member of its fine staff.

Seasons tickets for the Elba High football games will go on sale today (Thursday) according to school officials. The tickets and accompanying reserved seats will be sold on a first come-first served basis.

Tickets will be available at the high school office, Principal Lamar Foley also reminds Quarterback Club members that their membership cards are not season tickets. The first football game is scheduled in Elba for September 8th.

### Rabid Fox Killed North Of Elba

A rabid fox was killed by Mr. W. H. Taylor on his farm near Elba recently. Taylor shot the fox near a barn where several show cattle were housed. The head was sent to Dothan for conformation of the rabies and was returned as positive.

Taylor reports that another rabid fox was killed near his place the week before he killed one and warned local residents to beware of strange acting animals.

### Enterprise Speech Club To Compete Nationally

Varsity speech contestants at Enterprise State Junior College will carry the added prestige of national recognition as they compete in six state and regional tournaments during the 1967-68 school year. The ESJC speech club was accepted this summer as a chapter of the national junior college speech fraternity, Phi Rho Pi. It became the first chapter of the fraternity in Alabama and will be designated the "Alpha" chapter.

Instructor Howard Pelham, who coaches the speakers, said that a club must have completed successfully in five areas of speech to become eligible for Phi Rho Pi. The areas are debate, entertaining speech, persuasive speech, oral interpretation and extemporaneous speech.

Three members of the ESJC team already had attained advanced Phi Rho Pi ratings on the basis of their first-year performances at the time the ESJC chapter was accepted. Pelham said, Larry Land, Rebecca Johnson and Robert Akins.

The diversion payment for small farms is equal to 20 per cent of the total support for the first 20 per cent of the base acreage diverted and 50 per cent of the support on any additional acres diverted, to the total base.

The price-support payments (80 cents per bushel for corn and 53 cents per hundredweight for grain sorghum) are earned on the projected production from an acreage up to 50 per cent of the farm's total feed grain base by planting corn or grain sorghum, or by planting soybeans in lieu of these feed grains. The price-support payments are assured no matter what disposition is made of the crop.

The Chairman said that there should be no delay in the prompt receipt of the payment where the program provisions have been met. The payment will be made after the application form is completed and signed.

### Grain Program Payments To Be Made This Month

Growers participating in the 1967 feed grain program will begin getting final program payments soon after Aug. 15, Chairman, Agricultural Stabilization and Conservation Committee, said today. The payments will cover both diversion and price-support payments. The diversion payments were available only for small farms (farms with feed grain bases of 25 acres or less) and farms with large bases if the operation chose at time of signing up to plant no feed grain, up to plant no feed grain.

Growers had the opportunity-at sign-up time in the spring to request and advance payment of one-half the estimated total payment to be earned under the program. Where this was done, the payment now available represents the balance of the payment due for participation in the 1967 feed grain program.

In total, these payments are estimated at about \$265,000 for the expected 961 county participants in the 1967 feed grain program. The payments will raise returns from the 1967 corn and grain sorghum crops substantially. Farmers participating in the program are also eligible for loans on their entire 1967 crops of the two grains; national average loan rates are \$1.05 per bushel for corn and \$1.61 per hundred-weight for grain sorghum.

### Akins Talks To Elba Quarterbacks

Coach Leon Akins spoke to the Elba Quarterback Club Tuesday night and invited help and advice from all football fans. He further specified that he would prefer the advice on Friday, prior to the game rather than on the following Monday.

Akins discussed the potential of the Elba squad, which began workouts this week, and answered the question about a quarterback by saying that the team was in much better shape at quarterback than at some of the other positions.

The Chairman said that there should be no delay in the prompt receipt of the payment where the program provisions have been met. The payment will be made after the application form is completed and signed.

### WINS SAFETY SLOGAN CONTEST

W. H. Hess, center, received \$25 check from Lieutenant Colonel Virgil P. McGuire, deputy commander of permanent unit, Army Aviation Center Troop Brigade, Fort Rucker, Alabama, for submitting this month's winning safety slogan in the contest sponsored by School Support Company. The slogan is displayed on this page inside the post's Daleville Gate to encourage highway safety. Sgt. Hess also earned a three-day pass. Looking on are Captain James W. Gualtieri, left, company commander, and second and third place winners, Specialist 4 Dwight A. Welch, second from right, who received \$15, and Private First Class Erven E. Priest, \$10.

### Seven Shape Singing Planned

The Coffee County Fall Session of the Seven Shape Singing Convention will be held at Ashbury Methodist Church located 10 miles west of Enterprise on the Opp-Enterprise highway. The singing will be held on August 20th.

Everyone is invited to attend and join in the singing.

### Speed and Liquor Was His Blunder Now He Lies Six Feet Under

A man who was killed in a car accident last week is now lying in state at the Elba funeral home. The man was identified as [Name] and was a resident of [Address].

### Covington Co-op Members To Meet

Final plans have been completed, and all is in readiness for the 1967 members meeting of Covington Electric Cooperative which will be held at the Andalusia Municipal Stadium this Saturday evening, August 19.

An attendance of some 3,500 to 4,000 persons is expected for the meeting, which will include training, action of several business items, a humorous and interesting address, free entertainment, and the awarding of numerous attendance prizes.

Registration of Co-op members will start at 5:30 p.m., with the entertainment beginning at 6:45, and the business session at 7:30 p.m.

During the business session, reports on operations of the Cooperative will be presented, and two members elected to three-year terms on the Board of Trustees. Balloting will be on the following:

District I - J. B. Rodgers, Red Level, and Warren W. Hutcheson, Red Level Rt. 1.

District II - Earl Kelley and J. B. Hutto, both of Andalusia Rt. 5.

Messrs. Rodgers, Kelley and Hutto, along with Dr. George Donaldson, are nominees of the Abraham Baldwin Agricultural College, and a former member of the Georgia General Assembly (State Legislature).

Free entertainment will be provided by the Travelers Quartet, of Mobile. At the conclusion of the business session, some 30 electrical appliances and other gifts will be awarded as attendance prizes. The major items to be given are a 25" color television set, and an electric range. Each Co-op member registering will receive a free gift.

The Covington County Shrine Club will operate concession stands at the Andalusia Municipal Stadium during the meeting.

## Jus' Ramblin'

By  
LUCILE K.  
WOODMAN  
McRAE

IS MY FACE RED? Last week I was attempting to give credit to the Elba and Florida Rescue Squad. I realize that both are

doing a real good job so I wrote in my column telling them how much we all appreciate them. But I then failed to get the right one in The Clipper and the one for Florida was the one that made it to this newspaper. Boys, I'm sorry. I did not do it on purpose but I am just as guilty of getting the wrong article in the paper as if I had intended it that way.

The Elba Rescue Squad is doing such a good job and such a needed service. And those boys are not getting paid one cent for this service and many times their sleep is interrupted and they're apt to be out running a race with the stars, which actually did happen recently.

All I can say right now is that I am sorry I made such a mistake. But what was said was equally as true of the Rescue Squad in Elba and Florida so don't guess I did too bad.

Now this sounds interesting. It was his 92nd birthday, but Monday was a normal working day for Walt Mills. He celebrated it by working under-

ground which he has done a great deal of his life. He says he has never been ill in his life, has never lost a day's work, and has never taken a vacation. Mills, who lives with his 68-year-old wife in a house he built in Greensboro, North Carolina, has much to say about his active old age.

If I use my own medicine - no doctors, I don't smoke and I don't drink," he said. And I'm already wondering if I'll make it to Social Security collecting age.

JUST A FEW MORE weeks and we'll go back to normal time when we set the clocks back an hour. Nothing has been more confusing to me than daylight saving time. I wanted Alabama to abide by it if the rest of the nation was determined to do so because, after all, we're a part of the same country and we should get along - about the time of "clocks" anyway.

But after all daylight saving time has had no upset the entire summer, I can't get to bed early and I can't get to bed early. It is nearly time to get up when I get to bed and so it goes. I feel as if I have been running most of the time and I still can't keep up with it.

**Swollen Jaws? Be Careful**

Mumps is a virus infection of the parotid gland, one of the salivary glands, immediately below the earlobe and behind the angle of the jaw. The American Medical Association.

The best sign of mumps is a tender, smooth, firm swelling that covers the corner of the jawbone where it turns upward toward the ear, the parotid gland.

Mumps in a child is usually only a mild, incapacitating, and moderately uncomfortable. Many cases in children are so mild as to go unnoticed by parents. A mild infection for fever and the discomfort of mild headache and swollen glands may be used as needed.

The tendency for mumps with its attendant pain to settle in the ovary or testicle is well known. The chance of sterility is highly and emotionally overstated, however. Physicians usually prescribe complete bed rest for adults with mumps. Greater physical activity brings greater chance of complications.

Mumps is not excessively contagious and almost direct contact with the afflicted - such as drinking from the same cup or being sneezed at - is required to contract the disease.

One can get mumps twice, but it is a rare occurrence. Most cases of "mumps the second time" were the result of previous misdiagnosis of swollen neck glands from an infected throat. Odds are about one in 400 of having bona fide mumps as a repeat illness.

Mumps cannot be prevented at present, but recent research promises a vaccine soon.

## "Whatsoever Things"

BY DONALD E. WILDMON  
LUKA, MISSISSIPPI

We are living in an age of marvelous machines. Some of the computers that modern science has come up with are really fantastic machines. I want to share with you some information on what is one of the most unbelievable machines ever created. Let me tell you a little about this machine. It is about six inches wide at its widest point and four inches across. It weighs 12 ounces, and comes in a red-crown color. It is made to pump 2,000,000,000 times without failure or more than 10 times the performance expected from a cylinder in the engine of the highest priced car. It performs its job on the average more than 100,000 times a day, working seven days a week and 24 hours a day. It works three tenths of a second and then it has a rest period of one half of a second. It pushes liquid through 60,000 miles of tubes every day, or pumps enough liquid to fill a 4,000 gallon tank car every 24 hours. In 45 years it pumps more than 300,000 tons of liquid. This machine is made to work for about 70 years with little or no maintenance. What do you think this machine is?

Maybe you guessed it or maybe not. But I'm speaking about the human heart! It must certainly be considered one of the most fantastic creations ever.

And that's not too shocking once you know Who made the human heart. Man can never begin to compare creations with the Creator.

Maybe all these figures about the heart impressed you. They should. But there is something still more impressive about the heart than its statistical report. And that is what happens to a person when his heart comes into contact with its Creator.

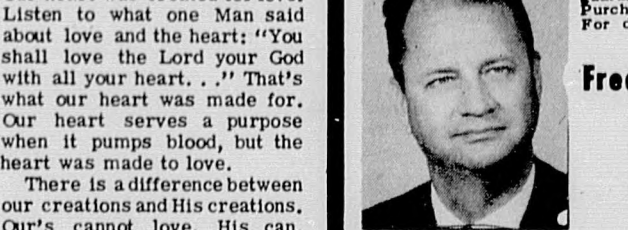

Our heart, you see, was created to do all the things that the above statistics says it does. But our heart was created for something else, also. Our heart was created for love. Listen to what one Man said about love and the heart: "You shall love the Lord your God with all your heart. . . That's what our heart was made for. Our heart serves a purpose when it pumps blood, but the heart was made to love.

There is a difference between our creations and His creations. Ours cannot love. His can. We do not make ours to love. He does. We can measure all our creations by statistics, which is not enough. He measures His by love, which is enough.

Yes, man has some very

fantastic creations in the world of today. But there is not a man-made creation in all the world that can compare with the human heart. It is an amazing creation. It is a wonderful creation. It is a lovely creation. But then, why shouldn't it be? It was made by an amazing, wonderful, loving God. And He made it that way!

(Mr. Wildmon welcomes your correspondence. Write him c/o Rt. 1, Luka, Miss. 38852)

BRANTLEY ANDALUSIA SAMSON

COFFEE NEWS & CHAT  
BY SARA E. HUTCHINSON

PEANUTS About this time of year homemakers become interested in preserving boiled peanuts. Peanuts can be either frozen or canned. They aren't much trouble. If you'd like information on the steps to preserving these boiled peanuts, call my office, Enterprise 347-6095 or Elba 897-6050. And I'll be glad to send you this information.

TEETH I am sure all of us would like and hope to have good sound teeth for a long, long time. We especially want our children to have good teeth. Therefore, we must not overlook proper dental care. For example, it is not true that cavities in baby teeth need not be filled because the teeth are but a placeholder. If a toothache stops, it doesn't mean the tooth is beginning to repair itself. Tooth enamel cannot repair itself.

EGG CARTONS The other day I read where there was an indication that cardboard egg cartons might be on their way out and being replaced by plastic. Why this trend? It was discovered that homemakers prefer clear plastic cartons because plastic cartons let them see inside without lifting the lid.

The cost of plastic containers would be two cents more than cardboard. But it seems as though homemakers are willing to pay the extra price.

WATCH YOUR WEIGHT It's a lot easier to keep a slim trim figure than it is to go on a strict reducing diet and lose weight. A slim figure helps you feel and look younger.

Take, for example, an overweight woman whose daily food provides her with just enough calories to maintain her weight. If she decreased by 1 hour daily the time spent in activities she does while sitting and spends this time in moderately active work around the house, this

IT'S UP TO YOU

By Howard E. Kershner, R.H.D.

Sacred Names, Unholy Practices

SELF-CONFESED radical, Sol Alinsky, professional agitator among the poor, and organizer of protests and demonstrations called "people's organizations," has written that "in the war against social evils there are no rules of fair play." He

Dr. Kershner

During the

Alinsky has been conducting one of his campaigns in Rochester, New York, called "FIGHT" meaning Freedom, Integration, God, Honor. Today, the use of these

well named is strangely incongruous with the tactics associated with the movement. Strange it is that the Rochester Council of Churches should seek to raise \$100 thousand to hire this professional agitator to set up one of his campaigns, using these tactics for the purpose of forcing its will upon the citizens of Rochester.

In recent months the campaign has been directed especially against the Kodak Company. This company is following a policy of integrating its labor force, and at considerable expense is training a substantial number of Negroes and others for the state employment service, the Urban League, the Monroe County Human Relations Commission, and others, in finding suitable applicants for this special training program. It has refused, however, to be intimidated into accepting the whole package "FIGHT" is trying to ram down its throat. It is most regrettable to find our church leaders joining in a coercive program directed against business organizations already following an enlightened policy of good will and helpfulness toward the less skilled and less competent members of the community. Sowing discord and advancing violence is not in the public interest or beneficial to that portion of our population needing assistance in qualifying for jobs.

## Pensions & Security

### Appointments Expire

Terms of one-third of the members of Alabama's state and county boards of Pensions and Security expire in August or September of this year, Governor Lurleen B. Wallace, State Board Chairman, said today, in commenting on the valuable service of these

lay boards to the people of Alabama.

"The law provides for a seven-member lay board in each county appointed by the county governing body (in cooperation with municipal authorities in urban areas) to serve six-year overlapping terms," Governor Wallace said. She added that members of the State Board (of which the Governor is ex-officio chairman) are also appointed for six-year terms. They are named by the Governor and confirmed by the State Senate.

It was explained that the terms of at least two members of each board expire every odd-numbered year. Appointing authorities may re-appoint members or make replacements. "Many county board members have served for several terms," the Governor said, "some since the 1950's."

County board members live in counties where they serve and at least two of every board must be women. The boards have responsibility to interpret community needs to the Department and agency services, resources, and limitations to the citizens they represent.

County boards are invaluable to the whole Pension and Security program," Governor Wallace declared. "They select the county director (administrator of the local program) from a Merit System register and approve the director's appointment of other staff. They can also make it clear to the professional workers the attitudes and understanding of the laymen, on the one hand, and can make it clear to the General public what the Department is trying to do on the other."

County boards elect their own officers and meet regularly and on call of the chairman. Every board develops its own pattern, some convening monthly, some quarterly, and others less often. All members work between meetings to strengthen public welfare services. There is, in addition, a statewide association of county board members which meets for mutual discussion of problems, goals, and responsibilities.

Belcher Wins Scholarship at Tuskegee

Milton Edward Belcher, son of Mr. and Mrs. Grover Belcher, Sr., and grandson of Mr. and Mrs. Tilton Lindsey of Elba, has been awarded the Tuskegee Institute Financial Aid Scholarship for \$1500.00. This award is an increase of \$600.00 over what he received last year.

This fall Milton will be a sophomore in the school of Arts and Science, majoring in political science. He engaged in many activities on campus last year while maintaining an overall grade point of 3.3, some of the activities that he engaged in were: F.E.P. (Freshman Experience Program), and C.S.U. (College Students Unlimited) program. He also served as secretary of the Alpha Phi Omega Fraternity after becoming a member.

Milton is a 1965 graduate of Elba High School and states that after graduation he plans to continue his studies in pursuit of his law degree.

University Confers 1,020 Degrees Friday

The University of Alabama will confer degrees on 1,020 students on August 18th at this year's summer commencement ceremony. The commencement speaker will be Dr. Thomas A. Spragens, president of Centre College, Danville, Kentucky.

Candidates for degrees include: Don R. Boswell, B. S. in CBA, Pre-Law; Myrtle Y. Bryan, M. S. in Secondary Education; Wankanta H. Parker, M. A. in Elementary Education and Charles Brewer, M. A. in Secondary Education. Boswell and Bryan are from Kinston and Brewer from New Brockton.

## Miss Cook, Mr. Tomberlin Wed In Enterprise

Mrs. William Lester Cook recently wed

Miss Martha Elaine Cook, daughter of Mr. and Mrs. William Lester Cook, Enterprise, became the bride of Mr. Jimmy C. Tomberlin, son of Mrs. Frances Tomberlin, Enterprise, and Mr. Joe Tomberlin, Keyline Community, on July 14, 1967, at seven o'clock in the evening.

Grandparents of the couple are Mr. and Mrs. W. D. Cook, Elba; Mrs. K. W. Adkinson of New Brockton formerly of Elba and the late Mr. Adkinson also of Elba; the late Mr. and Mrs. Carlos E. Roberts of Goodman Community; and the late Mr. and Mrs. William A. Tomberlin, Lincoln County line.

Reverend R. T. Lankford, pastor of the Elba Church of God, performed the double-ring ceremony. The couple took their vows before burning candles and greenery at the home of the bride's parents in Enterprise.

The bride's gown and train was fashioned of crepe and chintilly lace with the square neck and long fitted lace sleeves accented with bridal scallops. The fingertip veil of tulle was held by a small crepe pillbox covered with scalloped chintilly lace.

Miss Cook chose as her matron of honor, Mrs. Johnny Roberts of Enterprise, Miss Barbara Sue Cook served her sister as Junior Bridesmaid.

Both the matron of hon-

Al Fresco Fun  
When the weather turns balmy, the kind of *al fresco* (open air) fun a hostess can conjure up is almost limitless. There are patio, porch and terrace meals, block parties, poolside lunas, backyard cook-outs, clam-bakes, and a whole raft of take-your-pick

of parties! Make sure you've enough candles, torches or outdoor fixtures to make it easy to move around and see the food and serving areas. If you want things nice 'n' easy, opt for paper-everything. The paper industry has gone gay and gorgeous and you can get tablecloths, plates and cups in summery patterns—and a matching paper dress for yourself to boot.

The cardinal rule for the menu is "Keep It Simple." Prepare things *en masse*—a pot of baked beans, a tossed salad, fresh corn-on-the-cob, steaks, hamburgers, frank, chicken-in-parts, London broil. Make sure you have plenty of beverages.

It's a good idea to start cooking before your guests arrive, then they'll be greeted by the appetizing aromas of fresh corn, roiling food. That's the most exciting part of any *al fresco* affair!

## WHY DOES GOD CARE?

We are so tiny in the vastness of space, so drab in the grandeur of nature. Why does God care about each one of us?

This question has always plagued the mind of man. It will probably never be completely answered to his satisfaction until he sees and believes the evidence of man's importance to God: *That last made him a little lower than the angels.*

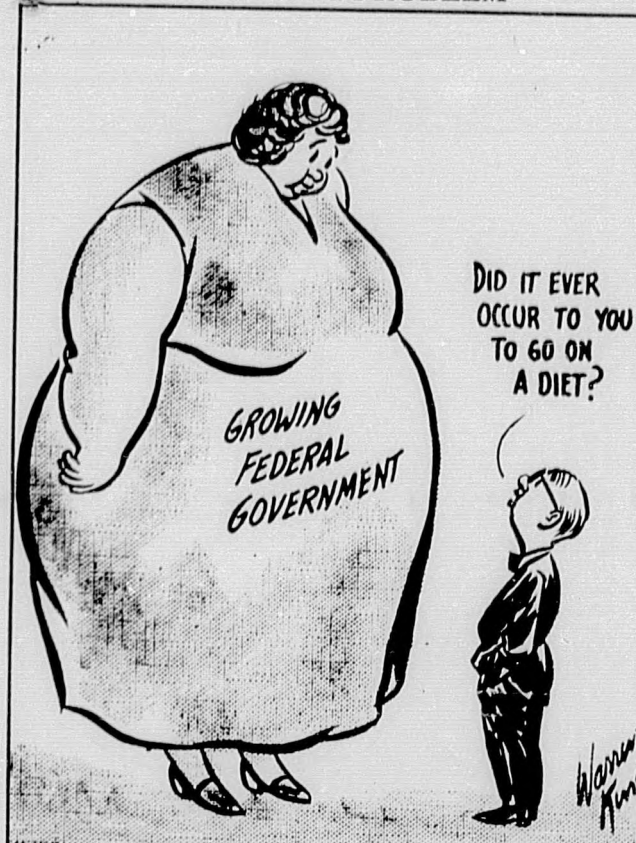

It remained for Jesus Christ to reveal the love of God. Sunday — World Communion Day — Christians will unite in the sacrament which is their richest experience of the glory and honor God has given.

The world over, men will rejoice in the Divine Love, so far-reaching, that God gave His Son for humanity.

## DOMESTIC PROBLEM

## JUST SOME FACTS

There are some important facts that we all should know about, facts that will help us to prevent a vastly higher level of Federal spending in the future. They are facts that are going up and up. They are:

1. Since 1960 the personnel comprising the civilian payroll of the Federal government has grown by 25%.
2. Since 1960 the cost of government payrolls, including the military, has grown by 75%.
3. Since 1960, non-defense expenditures of the government are up 97%.
4. Since 1960, expenditures for national welfare and health programs are up 210%.

These are just a few items that all Americans should consider. Facts that show there is a strong probability that government spending will double again in the 1970's, unless a major change in attitude takes place. It is being predicted that we will have a \$300 billion Federal budget by 1980. We wonder if the people really want this much government. Are we willing to pay for it? Can we pay for it?

Your legislators in Washington would like to know what you think!

## Car Serves as Living Room

For millions of Americans the family car becomes an extension of the home living room during vacation travel. This has led the home safety division of the Greater New York Safety Council to issue a bulletin on family vacation motoring with emphasis on the comfort and safety of youngsters.

Prepared by Mrs. Marjorie B. May, director of home safety, the bulletin advises that one adult assume the specific responsibility of reading to the children, tending to their care and otherwise keeping them from annoying the driver. It suggests such games as identifying birds or out-of-state license plates or keeping count of cows or red barns on opposite sides of the road.

## Thanks

Mrs. Dewey Dawkins

## CANCER STATISTICS ARE FRIGHTENING

The Strang Clinic in New York City, famed for cancer detection, recently reported that one in every 100 patients past 40 who feel well and appear to have good health probably has cancer. Fortunately, reported Dr. Emerson Day, the Strang Clinic director, most of these cancers can be diagnosed by the family physician.

When discovered and treated at this pre-symptomatic stage, the chance of a cure is increased greatly. These facts of life or death make it imperative that every adult get regular health checkups.

YOUR DOCTOR CAN PHONE US when you need a medicine. Pick up your prescription if shopping nearby, or we will deliver promptly without extra charge. A great many people entrust us with their prescriptions. May we compound and dispense yours?

## WOMEN'S HEALTH NEWS

### DOCTORS QUIT BUT YOUNG PEOPLE SMOKE

Between 1954 and 1964 the percentage of doctors who smoked cigarettes fell from 50 percent to less than 30 percent.

According to a report made by the U. S. Public Health Service at the recent meeting here of the American Medical Association, "Many physicians stopped smoking because they knew that the death rate for cigarette smokers in comparison to that of non-smokers is 70 percent higher from all causes; 500 percent higher from chronic bronchitis and emphysema; and 1,000 percent, higher from lung cancer."

While the experts were cutting down though, young people continued to smoke more heavily than ever. A study of almost 500 young people, aged about 21, showed that five and a half years after an initial examination of their smoking habits almost twice as many were smoking as had smoked. In addition, almost nine out of 10 those who smoked in 1959 continued to do so in 1965. Most of those who said in 1959 that they had discontinued smoking had resumed by 1965.

Nearly three out of four boys and three out of five

girls who thought in 1959 that they might become smokers did indeed begin smoking. Consumption of cigarettes increased by more than four packs a week for both boys and girls.

According to Eva J. Sabher, M.D., consultant in Harvard's School of Public Health, attitudes about smoking are established before the effects of education about the effects of smoking should begin in about the fifth or sixth grade.

### TODAY'S MAN FOUND TALLER, HEAVIER

A child born today is not only likely to live longer than his forebears did, he is also likely to be heavier and taller than they were. This is the finding of Dr. M.H. Wittenborg, president-elect of the Society of Pediatric Radiology.

In an article in the AMERICAN JOURNAL OF ROENTGENOLOGY, pointed out that a one-year old infant today is seven percent taller and 12-15 percent heavier than a child in the previous century. His brother aged nine to 14 is likely to be six to eight percent taller and 12 to 15 percent heavier.

ANY FOOD MAY CAUSE ALLERGY IN TODDLERS. The commonly held notion that no child is allergic to such foods as lamb, peas, rice and white potatoes is false. Any food may cause allergy. These views were reported by Dr. Frederic Speer, of the University of Kansas Pediatric Allergy Clinic at a recent meeting here of the American Medical Association.

In a study of 267 food-allergic children under two years of age, Dr. Speer found that milk was the most common offender, followed by citrus fruits, the pea family (beans, soybeans and soybean formulas, peanuts and peas); eggs; and chocolate. Others in order, were corn, wheat, tomatoes, rice, oats and beef.

"Allergy to foods is not

## Report Maid Wages

Each week the social third quarter of the security office receives year. If a maid is paid less than \$50 or more, the wages must be reported by October 31st.

The maid cannot decide whether taxes will be withheld or not, Mr. Scott said. The employer is required to withhold 4.4% from the maid's wages and to match

this with an equal amount. Failure to report the wages paid to a maid would make the employer liable for the entire amount of social security tax plus penalty and interest. For more information about how to report household employees, get in touch with your social security office located at the Federal Building, 100 West Troy Street in Dothan, Alabama.

## Social Security Office Marks 30th Anniversary

On August 24, thirty years ago Dothan got in on the ground floor of what has since become a good sized building.

Dothan was one of the 200 communities across the country selected as a site for a social security office when the social security system was being put into operation in late 1936 and early 1937.

Now as the Dothan office celebrates its 30th anniversary, the services offered by social security offices have increased and so have the number of local offices. To the ground floor of retirement protection has been added survivors protection, disability protection, and health insurance protection, and Dothan is now one of 700 towns and cities which has a local social security office.

When the Dothan social security office opened August 24, 1937 upstairs in the

Porter - Farmer Building, in the Dothan office and there was a staff of two on hand to greet the community. The work then consisted mainly of issuing account number cards to workers in commerce and industry -- the only one then covered by social security. At that time workers could look forward only to monthly benefits for survivors.

"We still take applications for account numbers," said social security district manager Harry N. Scott, "but for example, last year we also took 11,862 claims for benefits, and answered questions for 186,177 people who visited our office. He added that the staff is larger than in 1937 too; "There are now 21 men and women working."

## LEGAL NOTICES

IN THE MATTER OF THE ESTATE OF WILLIAM DREW DAWKINS, DECEASED.

IN THE PROBATE COURT OF COFFEE COUNTY, ALABAMA, ELBA DIVISION

Letters testamentary under the last will and testament of said deceased having been granted to the undersigned on the 2nd day of August 1967, by the Honorable J. O. English, Judge of said Court, the undersigned hereby gives notice that all persons having claims against said estate are hereby required to present the same within the time allowed by law or the same will be barred.

### Roaches Are Worst

### Household Pest

Have you gone to the kitchen at night and seen roaches scurrying in every direction as soon as you snap on the light? Don't panic, they can be controlled.

Roaches -- perhaps the worst household pests in Alabama -- feed on food and filth. Thus, spots of house-keeping is essential, says Dr. Roy J. Ledbetter, Auburn University Extension entomologist. Dispose of garbage promptly, especially waste food materials. Some species of roaches spend the daylight hours in garages, wood piles, sewers or basements and may enter homes searching for food or warmth at night.

To discourage these night visitors, seal cracks and openings around water and drain pipes. Fill cracks around baseboards and between floor boards. And make sure doors and windows are tight-fitting.

When roaches are spotted in the home, Ledbetter recommends that household sanitation be supplemented by an insecticide. He suggests that one of the following insecticides be used in one gal-

within the time allowed by law, or that the same will be barred.

By Tom Casaday, County Extension Chairman

## FARM NEWS

INEXPENSIVE I received a copy of a letter today that Robert Reynolds, Geneva County Extension Chairman, sent to Geneva peanut growers.

He had this to say: "You can do more to increase your profits from peanuts in the next three weeks than at anytime during the year, and it won't cost a cent!"

Just wait until the Wiregrass Substation has shown that yields were increased as much as 722 pounds per acre by waiting only 7 days. That is 100 pounds a day which is mighty good wages for waiting."

However, you must control leafspot disease and white mold, but mold is controlled as leaf-spot is controlled.

Robert Lee, Extension seed marketing specialist at Auburn, had this to say about seed treatment: "Seed treatment costs only a few cents an acre to give invaluable protection against diseases that attack seeds, seedlings, and mature plants. Doing without seed treatment is like keeping insurance."

We will be planting a lot of small grains within 30 days. You can save yourself a lot of disappointment by insisting on a good seed treatment before you put your valuable seed in the ground.

We have a lot of folks who are making plans now to plant small grains in September.

PLANTING GRAZING CROPS

Rolan Day of Route One, Samson, has strong opinions about growing peanuts and cotton. He does an excellent job with both, and he is talking a few days ago about planting small grains. Day said that a few years back, he started using grain drillers

to plant small grains in September.
